

## Laerdal Pocket Mask

Cat. No. 82001133

The most widely used CPR mask in the world!

### Quality CPR device

The Laerdal Pocket Mask's design, filter and one-way valve make it a quality choice that provides protection during CPR.

By creating a slight distance between the patient and care provider the Pocket Mask also makes seeing patient lip color and chest movement easier.

A high-quality Techno stat filter under a one-way valve filters out contaminants in the air being transferred between the care provider and the patient, protecting them both.

## What do you use your Pocket Mask for?

The Pocket Mask is available in a variety of options for your convenience:

Incorporating an oxygen inlet, that facilitates the delivery of supplemental oxygen, is an option. This version also comes with an elastic head strap.

- Packaging options include a hard case, a soft case with a belt loop, or a Poly Bag.
- Private labeling is available on the hard case and soft shell which allows for corporate branding and easy identification.

## Children are not just small adults

The Pocket Mask also comes in a special pediatric version that has a smaller, circular silicone mask that fits pediatric faces and provides a tighter seal for correct resuscitation.
